

## REFERENCE – drinking water RONCADIN SpA, 33092 Meduno, Italy

**Products:** CLASSIC

The traditional Italian industrial company for bakery products, pizza dough & ice cream uses EWO - water revitalization in its production.

RONCADIN is one of the largest pizza and ice cream producers in Europe!  
The manufactured, well-known brands are for example: Landliebe, Schatztruhe, Nasch, Valensina-Eis, Fit-for-Fun-Eis and many others.

After installing an EWO water revitalization test into Mr Renzo Roncadin's private swimming pool, algae problems have disappeared and chemical agents, including chlorine, have been greatly reduced after installation.  
Mr. Roncadin reports that everyone in the family immediately noticed the improved water quality. The initial scepticism was gone quickly!

The very positive effects in the pool were then the reason for further tests in the laboratory of the food manufacturer.  
**One noticed that the doughs are more plastic and have more volume.**

**Since the laboratory tests showed clearly obvious advantages, the entire production plants are supplied with revitalized water.**
